**Date:** MARCH 1986

## KOMPAC II SAFETY DECALS

To insure the operational safety of the Kompac II, new safety decals are now available for placement on all models. The decals note the necessity of keeping hands and fingers clear of the Kompac II, during operation, because of its inward roller nip. All currently manufactured Kompac dampening systems have these decals affixed. However, those Kompac II units you have installed in the field should also be included in this effort. In the course of service or maintenance calls please attach the decals as indicated below. Please contact Graph Tech for availability of these safety decals which will be supplied at no charge.
