# NEW CHIEF BRACKETS DESIGNED WITHOUT ECCENTRICS

Graph Tech has redesigned the mounting brackets for the Kompac Model AF 17 and 17G. The first lot of brackets have been reworked and will have the eccentric pinned in place. The next lot will be a solid bracket with 2 holes for mounting. The AF 15 and 15G brackets will be available later in the same version.

The new procedure for adjusting the Kompac form roller stripe now eliminates turning eccentrics. The set screw at the end of the bracket foot now adjusts the form stripe. Turning the set screw clockwise causes a lighter stripe. Turning the set screw counter clockwise causes a heavier stripe.

These brackets are now available for retrofit and will be packed with new units as well. Remember these brackets are only available for the AF 17 and AF 17G. The AF 15 and AF 15G brackets will be in production in October.

The price for the brackets are \$45.00 each and the part numbers are as follows:

### AF 17 & 17G

Left 93755

Right 93756

### AF 15 & 15G

Left 93717

Right 97716

Our thanks to the dealers who have helped test this design and to everyone else for your patience. Your input helped develop this bracket, and we welcome all your suggestions as we are constantly striving to keep Kompac the best dampener in the world.
