

KOMPAC TECHNICAL UPDATE

NO: 43
DATE: FEBRUARY 1993
TO: ALL KOMPAC
DEALERS
SUBJECT: END FRAME
BEARING CHANGE

Effective January 1, 1993, Graph Tech began using sealed end frame bearings on all RYB 2728 and RYB 3200 Kompac units produced. This improvement will eliminate moisture from getting into the bearing, causing possible failure. If you are currently experiencing this problem and the Kompac unit is still within the one year warranty period, you can replace these parts under the standard warranty claim procedure. Labor, however, will not be credited. If a Kompac unit is over the warranty period, you can upgrade to the new style for a flat rate charge of \$150.00. There will be no dealer discount for these parts. Old style parts will still be available. The parts affected by the change are: form roller, end frame, end frame bearing and gear clutch. The following is a list of part numbers and color codes to assist you in ordering the correct parts.

Part Number	Description	Color Code	Kompac Model
1-92530	11 1/2" Form Roller - New Style	Purple	RYB 2728
1-99140	11 1/2" Form Roller - Old Style	Brown	RYB 2728
1-92870	Gear Clutch - New Style	Brown and Black	RYB 2728
1-92900	Gear Clutch - Old Style	Brown	RYB 2728
1-92550	12 11/32" Form Roller - New Style	Gold	RYB 3200
1-99150	12 11/32" Form Roller - Old Style	Orange	RYB 3200
1-92880	Gear Clutch - New Style	Brown and Black	RYB 3200
1-92890	Gear Clutch - Old Style	Brown	RYB 3200
1-92330	End Frame - New Style	-	All
1-91966	Steel Washer	-	All
1-91662	Retaining Ring	-	All
1-92586	End Frame Bearing - New Style	-	All
1-92950	End Frame Bearing - Old Style	-	All

NOTE: New style end frame bearings will come pressed on the form roller shaft. If you are upgrading to the new style, there is no need for you to order the bearing separately.

Look for a special 50% dealer discount on selected models coming your way!
