How to use the parts list

1. Section number

This parts list is divided into machine sections and each section has a number.

(Example) Section number

5310G 510

The section number

The machine model number

* This number includes both the machine model number and the section number.

2. How to use the parts list

1) To find the part number(when ordering the part)

2) To find the section number and the position identification number of the part in the illustration when knowing the part number

To find the section number and the position identification number use the part number index at the end of this manual.
